

## **The Weather of the Pacific Northwest**

Cliff Mass, a professor of atmospheric sciences at the University of Washington has created a book that spells out every weather condition and anomaly that lurks in the skies of the Pacific Northwest. A must-read for any rider. Get it at the UW bookstore or online at [www.soundrider.com/store](http://www.soundrider.com/store).

### **Washington Backcountry Discovery Route**

You may have heard of the Oregon Backcountry Discovery Route that leads riders through Oregon from the border of California to Walla Walla. During the research for this book we came up with our own such ride through Washington State. Packed full of great gravel roads and stunning viewpoints this route makes a great five day trip, or you can do the nine provided segments at your leisure. Unlike its Oregon sister, this route is designed to provide ample food and fuel locations as well as hotel and camping suggestions along for each day. Order your copy online at [www.soundrider.com/store](http://www.soundrider.com/store)

### **Optional GPS Files**

You'll enjoy this book much more if you use a GPS and load the optional GPS files created to go along with it. If you don't already have those files, you can purchase them online at [www.soundrider.com/store](http://www.soundrider.com/store).
